

Spring into savings

Spring is a great time to refresh your water habits at home. Simple steps—like **fixing leaks, adjusting irrigation schedules, and upgrading to high-efficiency fixtures**—can help you save water. This season, we're here to help you spring into savings with practical tips, helpful programs, and rebates that support efficient water use and a healthy landscape.

Conservation programs

Toilet rebate: Make every flush count

Get \$150 back on newly installed WaterSense toilets. Limit 2 per household.

Conservation devices: Simple tools, big impact

Easy-to-use, simple water-saving kits and WaterSense showerheads to fit your home's needs. These items offer a range of features to help you use water efficiently.

WBIC: The smart way to water

Replace your standard irrigation controller with a controller that adjusts automatically to the weather. Call WaterWise Consulting at 1-866-648-2925 to learn more.

To apply or learn more about programs available to you, visit www.libertyenergyandwater.com or **scan the QR code**.

Smart watering tips

- **Irrigation systems should always be inspected** each spring for potential damage from the winter season.
- **Water your lawn early in the morning** to reduce evaporation and lower risk of fungal disease.
- **Consider native plants** as you start preparing your garden for the season ahead.

Native plant highlight

The **Lemon Beebalm** is fragrant, water-smart East Texas native with tiered purple blooms that attract bees, butterflies, and hummingbirds while thriving with minimal irrigation.
