

Water Efficient Practices

- Adjust your irrigation controller to irrigate your lawn before 6 a.m.
- Upgrade existing irrigation systems or landscaping with tools such as weather-based controllers or drip irrigation.
- Use mulch around shrubs and trees to retain moisture and reduce run-off.
- Use a pool cover to reduce evaporation, decrease the amount of time you spend refilling your pool, and keep it cleaner.
- Check for and repair leaks inside and outside of your home.
- Make behavioral water conservation changes such as turning water off while brushing your teeth or taking shorter showers.
- Replace water-using equipment with higher efficiency models. Look for the WaterSense and ENERGY STAR labels.

We also offer a variety of programs to help increase your water use efficiency! To view and apply for programs that fit your conservation needs, scan the QR code below or visit our water programs page under the "Smart Water Use" tab at libertyenergyandwater.com.

If you have questions about how you can use water efficiently, please call 844-367-2030 and ask to speak with our water efficiency team or email Conservation@libertyutilities.com

Beginning April 15, 2024 through September 30, 2024, Liberty is asking our customers to practice voluntary water conservation. Here is a suggested list of water efficient practices to help you save water.

If you desire more information you may contact Liberty's regional office at 844-367-2032 or visit our website at libertyenergyandwater.com. You will be updated with any changes at the notice posting areas and on our website. We appreciate your effort and cooperation in the matter.
