

## Drought Posting

**Beginning April 15, 2019 through September 30, 2019**, Liberty Utilities is asking our customers to practice voluntary water conservation. We ask that you review the list of non-essential usage items plus familiarize yourself with common practices of conserving water. If you would like more information, please contact us at **(903) 730-4840** or visit our website at [www.libertyutilities.com](http://www.libertyutilities.com).

You will be updated with any changes at the notice posting areas, on our website, and on Facebook and Twitter. *We appreciate your effort in this matter!*

### INDOOR CONSERVATION

Install or replace your faucet aerators. Save 1-2 gallons per minute.

Take a 5 minute shower. 10 gallons of water are used for a 5 minute shower, 30+ gallons for a bath.

Turn water off while brushing your teeth. Save 2-4 gallons every time you brush your teeth.

Don't let the water run while washing dishes. Save 8-20 gallons of water.

Only run full loads of dishes and laundry. Save up to 15 gallons per load.

### OUTDOOR CONSERVATION

Plant native, water-efficient shrubs, trees, and grasses.

Water lawn and plants early in the morning. In the morning there is less water lost to evaporation and wind.

Don't cut more than 1/3 of your lawn's length at one time. Taller grasses hold moisture better.

Use mulch around your shrubs and trees. It will retain moisture, reduce run-off, moderate soil temperature, and help with weed control.

Use drip irrigation on your plants.

If you use a spray nozzle on the end of your hose, it can save water while you wash your car, your pets, and other outdoor water activities.

# 5 WAYS TO PAY

Liberty Utilities has multiple options for how to pay your bill:

- ✓ **Pay Online with a credit or debit card:** Click the "Pay My Bill" button on the [www.libertyutilities.com](http://www.libertyutilities.com) homepage. Click "Make a Payment" under the "Credit | ATM Debit" box.
- ✓ **Pay by Phone:** Call us at **903-730-4840** to make a payment. Please note, we cannot accept checks over the phone.
- ✓ **Pay In Person:** Come into our Liberty Utilities Walk-in Center at 16623 FM 2493 Suite E, Tyler, TX, 75703.
- ✓ **Pay by Mail:** Please return the lower portion of your statement, "Payment Coupon", along with a check or money order in the envelope provided with your bill and mail to: Liberty Utilities, 16623 FM 2493 Suite E, Tyler, TX, 75703.
- ✓ **Automatic Payments with SurePay:** Sign up for Autopay with Surepay and your monthly payment will be automatically deducting from the account of your choice. Visit [libertyutilities.com](http://libertyutilities.com) and click on "Make Payment" to sign up for SurePay.

**We Care about Our Community!**

**Liberty Utilities** believes in being local and responsive because we care about our communities. When you care, you'll inspire others to do the same. Our communities inspire us and we want to inspire others. It was in that spirit of caring for our communities, that a Liberty Utilities employee noticed quite a bit of trash that had been dumped in a creek bed. The creek bed was not officially Liberty Utilities property, however, this employee wanted to do the right thing and clean it up. He told others around the office about his discovery and what he was planning to do. They too wanted to help. Thank you to our employees for caring enough about our communities to come together and do a good deed. Above is a photo of just some of the trash they picked up and hauled off.

## WHICH IRRIGATION SYSTEM WORKS FOR YOU?

July is Smart Irrigation Month! Prepare for the summer by using the most water efficient techniques and systems!

### SMART IRRIGATION SYSTEM

Smart Irrigation systems tailor watering schedules and run times automatically to meet specific landscape needs. These controllers significantly improve outdoor water use – saving water and money.

### DRIP IRRIGATION

Drip irrigation is a type of watering system to save water by allowing water to drip slowly to the roots of plants. The system will place water directly into the soil, on the roots, to minimize evaporation and water efficiently. **Check out our video on our Smart Water Use page at [www.libertyutilities.com](http://www.libertyutilities.com) to see how to install drip irrigation yourself!**

### HAND WATERING

If you have to hand water, make sure you use a soil probe or long screwdriver and plunge it into the soil to ensure the moisture is 6 – 10 inches deep. This will make sure you do not overwater. Overwatering can lead to root rot and soil compaction that robs the roots of oxygen.
